## ADVANCED CHEMISTRY WHEN NEEDED

Colloidal Resource AB offers expertise in chemistry to all companies. We serve our clients by solving chemistry related problems using our expertise in chemistry and the advanced technology of Lund University. We can be found at the Chemical Centre where we use state-of-the-art instruments, unique as well as traditional. The use of these instruments, and the scientific approach, are ways to stay in the frontline.

## THEORY TO COMPLEMENT EXPERIENCE

After a thorough evaluation of the situation, we provide a project plan, our selves as project leaders or performers and the possibility to run measurements at Lund University. Thereby you can have results from everything between a quick analysis and a complex project. We know what is going on at the scientific frontier and how this can be used for your purpose and benefit

## TECHNOLOGY THAT GIVES A HEAD START

Advanced instruments give better arguments for the marketing department at the same time as the scientific perspective can show the way out of time consuming trial-and-error. Through us you will have access to instruments that can give both safer and faster results, an asset that makes the company prepared for questions above the apparently conceivable.

It could be a singular test that shortens the way to a final result or a longer collaboration for a better product, patent description or arguments that sell. With access to the instrument needed when needed it is possible to get the head start you need. Let us know your problem and we will find the method to be used.

## EXPERTS THAT UNDERSTAND CUSTOMER VALUE

We know science as well as business. We understand your problems, wishes and demands and we can turn this into valuable solutions for you and your clients. We make sure that solution, technology and priorities are in harmony with the best customer use.

## WELCOME - LET'S INCREASE BUSINESS

You are welcome to discover how technology and competence can increase business for your company. For references - call us, e-mail or check out our web page.
